TENTHS OF MILE

# SABAN POND

Palermo Twp., Waldo County  
U.S.G.S. Palermo, Maine

## Fishes

Brook trout  
Smallmouth bass  
Minnnows  
Golden shiner

White sucker  
American eel

## Physical Characteristics

Area - 11 acres

Maximum depth - 43 feet

Principal fishery: Smallmouth bass

Temperatures:  
Surface - 78<sup>0</sup>F  
40 feet - 40<sup>0</sup>F

Saban Pond once maintained a small brook trout fishery, but very few trout are taken today. Water quality during the summer months, with very little dissolved oxygen below a depth of 10 feet, is the limiting factor in maintaining a population of brook trout.

The addition of smallmouth bass is another important factor limiting the trout fishery. Brook trout cannot effectively compete with bass under marginal water quality conditions.

Surveyed - July, 1966

Revised - 1998
